

Alltec Screens Tripod Screens

The Alltec Screens Tripod Series is the ideal portable budget solution for mobile presentations! Perfect for classrooms, training rooms, trade shows and even limited outdoor use. Rugged and easily setup in minutes, the tripod is a very versatile solution for any of your projection needs.

Design and Construction

The Alltec Tripod Projector Screen is designed for daily ease of use and portability. Simply retract the screen into the casing, lower the upper adjustable shaft, fold up the tripod legs/base, and pivot the screen casing to create a single unit that's easily transported via the carrying handle. The Alltec Tripod projector screen also features a built-in keystone eliminator in the upper shaft, which allows the screen to tilt forward in multiple increments, in order to compensate for angled tabletop projection setups. If being used outdoors, we recommend additional restraints to be added and use only during ideal outdoor weather conditions.

The Alltec Tripod Projector Screen is constructed with a circular lightweight steel casing and plastic endcaps to avoid possible transportation damage. The attractive white or black powder coated exterior will blend into any room where it's displayed, to create a professional presentation. The Tripod screen come standard in a Square 1:1 aspect ratio that can be easily adjusted to accommodate various other formats, by simply adjusting the height shaft.

Key Features

- Alltec Tripod projector screens range from 71" to 135" diagonal sizes
- Contemporary white or black powder coated circular Steel casing for durability
- Easy to store and transport
- User-friendly quick and easy setup/release, with adjustable height and housing position
- Perfect for 4K Ultra HD and HD Resolutions
- Self-locking handle for optimum height adjustment and portability
- Large 1 5/8" aluminum alloy roller keeps the screen flat throughout repeated use
- Perfectly symmetrical tripod for great stability and extensive use, with 2mm steel legs and housing
- Standard 1" black masking borders on all sides for excess light absorption
- Standard keystone eliminator screen to avoid skewed image output
- Matte white projection screen fabric with black backing, 1.0 gain and 120° viewing angle
- Available in Square(1:1) aspect ratios
- 1 year warranty

Matte White Fabric

Viewing Angle: 120° / Gain: 1.0

Matte White – The most versatile screen fabric surface and the premier choice when ambient light is controllable. The Matte White projector screen fabric evenly distributes light over a wide viewing area, while colors remain bright and life-like, with no shifts in hue or contrast. The 120° viewing angle allows for a very wide audience seating arrangement. With an even Gain of 1.0, this projector screen fabric allows for no loss of brightness from the projection source, as long as ambient light is controlled. A black backing to the fabric is also added to impede any light penetration from behind the projected surface.

The matte white screen surface can be easily and safely cleaned with mild soap and water. Do not use any other stronger chemical cleaners, as this may negatively affect the projection surface. The fabric surface is also flame retardant and mildew resistant.

Specifications and Dimensions

Model Number	Diagonal	View Width	View Height	Case Size (LxWxH)	Package Size (LxWxH) & Weight	Case Color	Aspect Ratio	Screen Material
