

FAST-FOLD **NXT**

FOR YOUR IMAGE™

The Best is Better than Ever

We listened to you. We talked to buyers, business owners, product managers, end users, stage engineers and the technicians that set up rental screens every day.

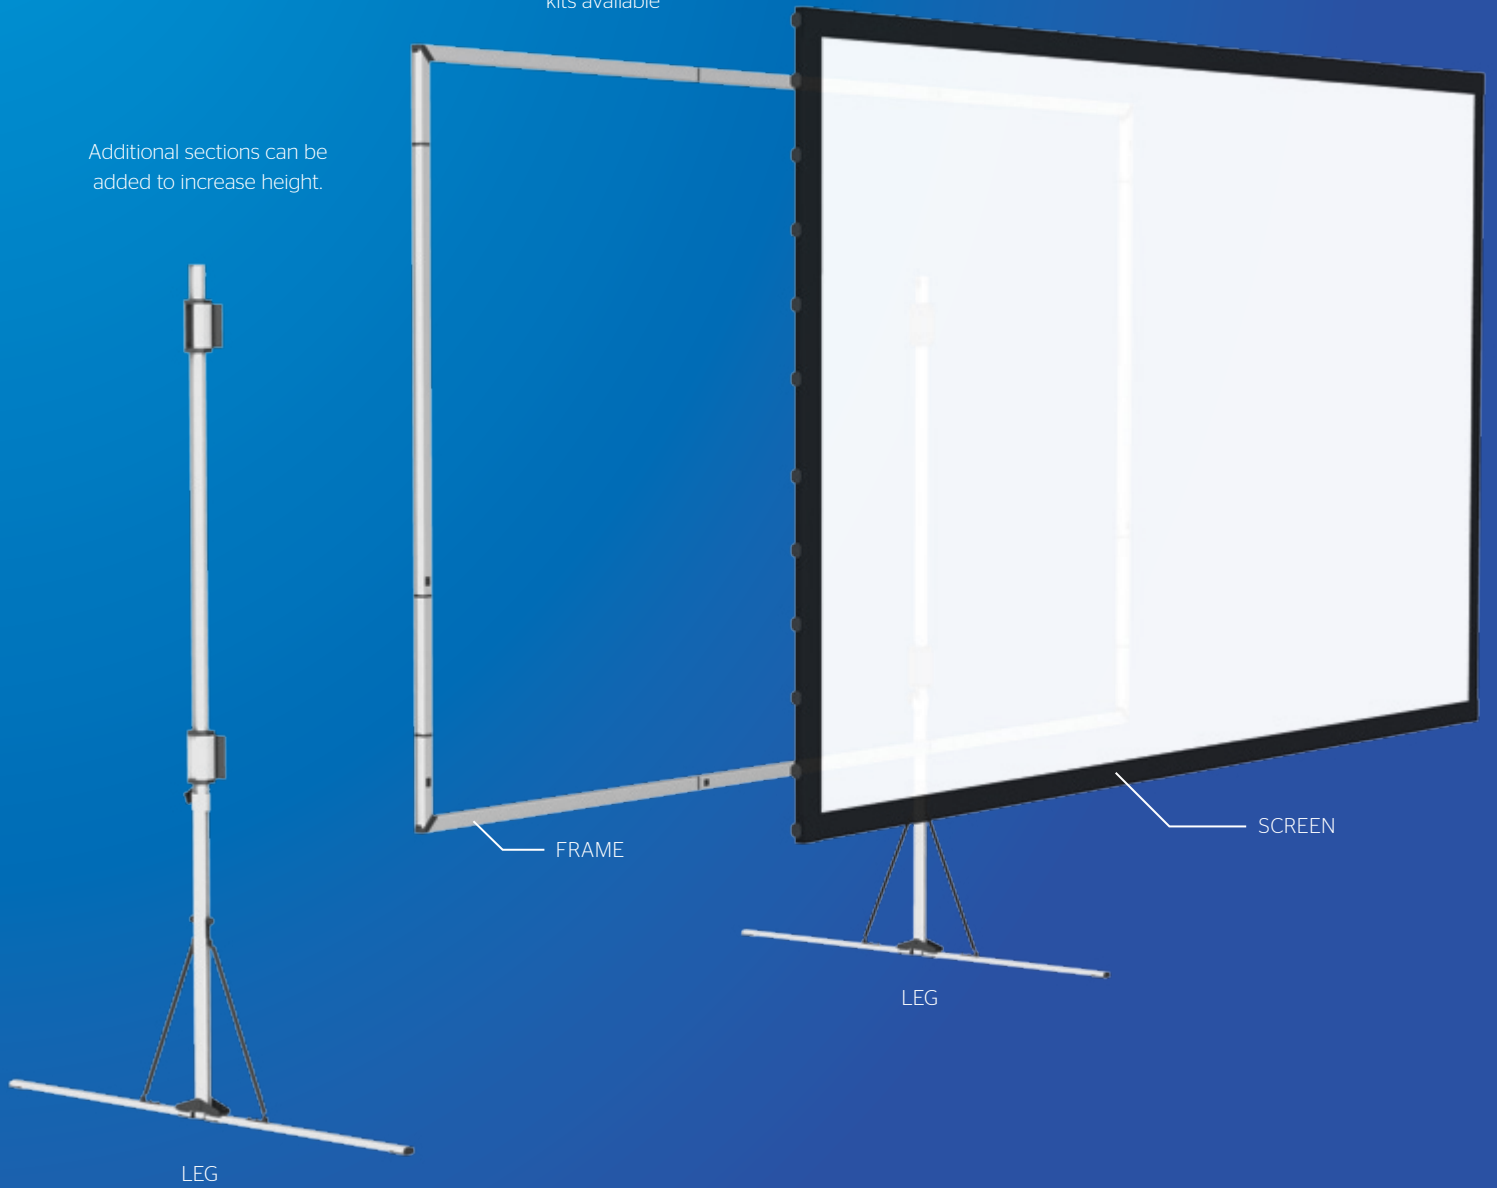

We listened to what was important to you, and designed a work horse that is stronger, faster and simpler in the ways that make a difference. All delivered in a great looking product complete with foldable 4K optic capabilities, for your image.

We've Eliminated:

- ⊘ Rivets
- ⊘ Snaps
- ⊘ Speedy Cranks
- ⊘ Sewing
- ⊘ Pull Tabs

Aspect ratio conversion kits available

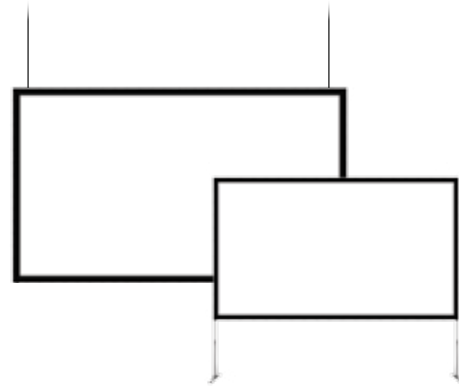

Additional sections can be added to increase height.

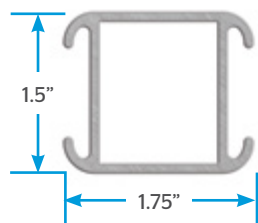

Simplified attachments to speed set up time.

New Extrusion

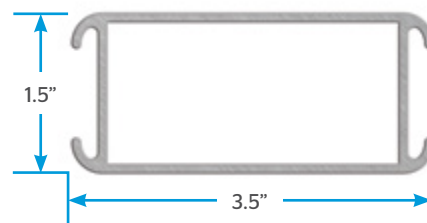

- More aluminum means a slightly larger frame and more strength
- Ribs give additional strength where you need it and prevent bowing
- Shape improves aesthetic of frame and streamlines accessories by centralizing the location of all attachments
- Fly any model
- Orient any screen in portrait or landscape format

Universal frame design can both fly or be on legs

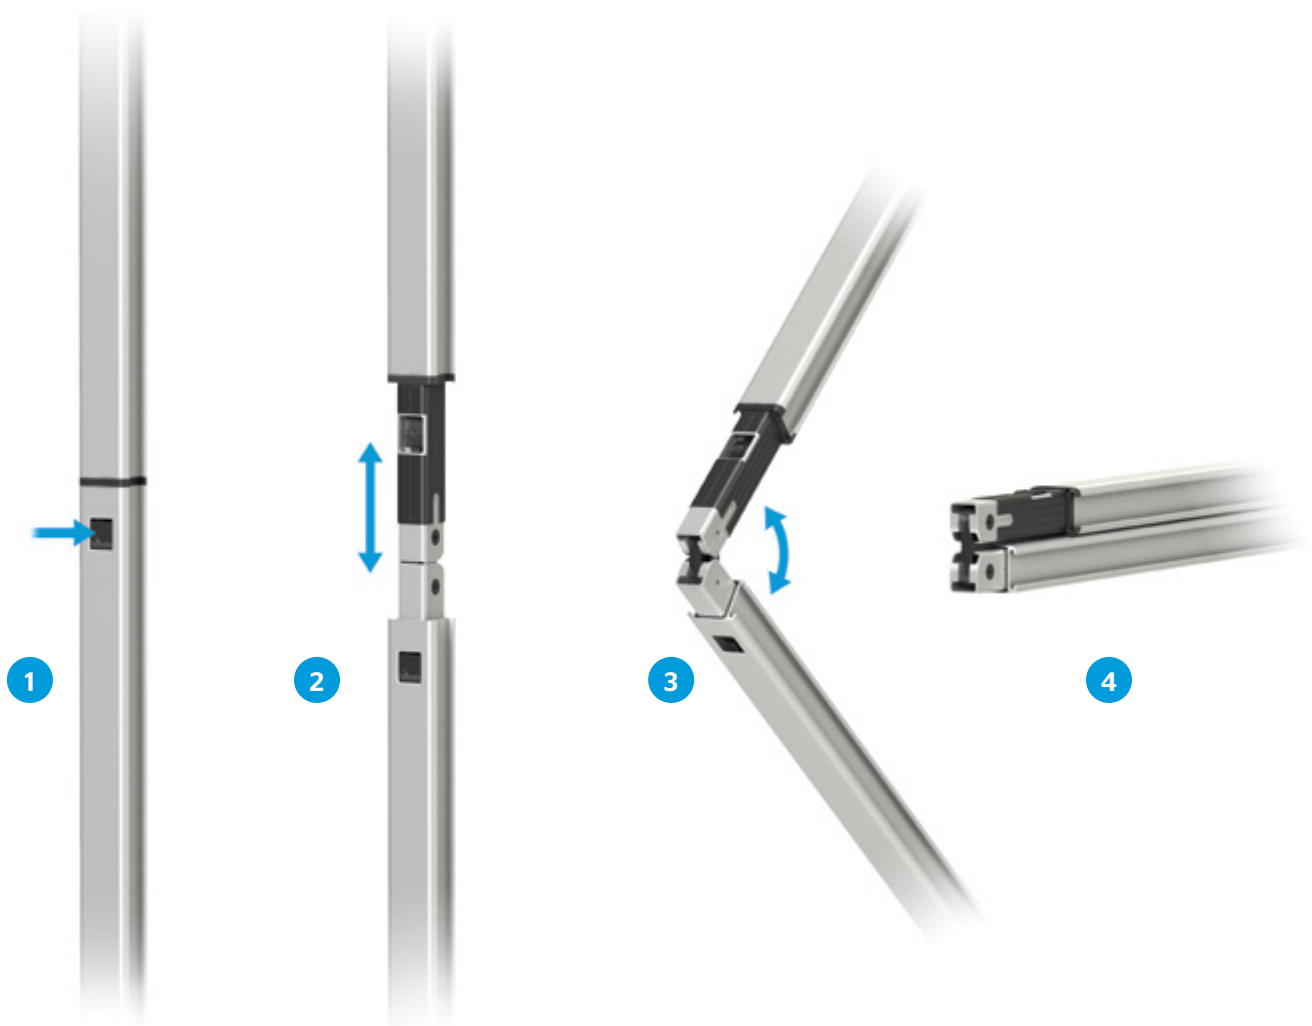

Standard extrusion for smaller sizes.

Wider extrusion for larger sizes.

New Hinge

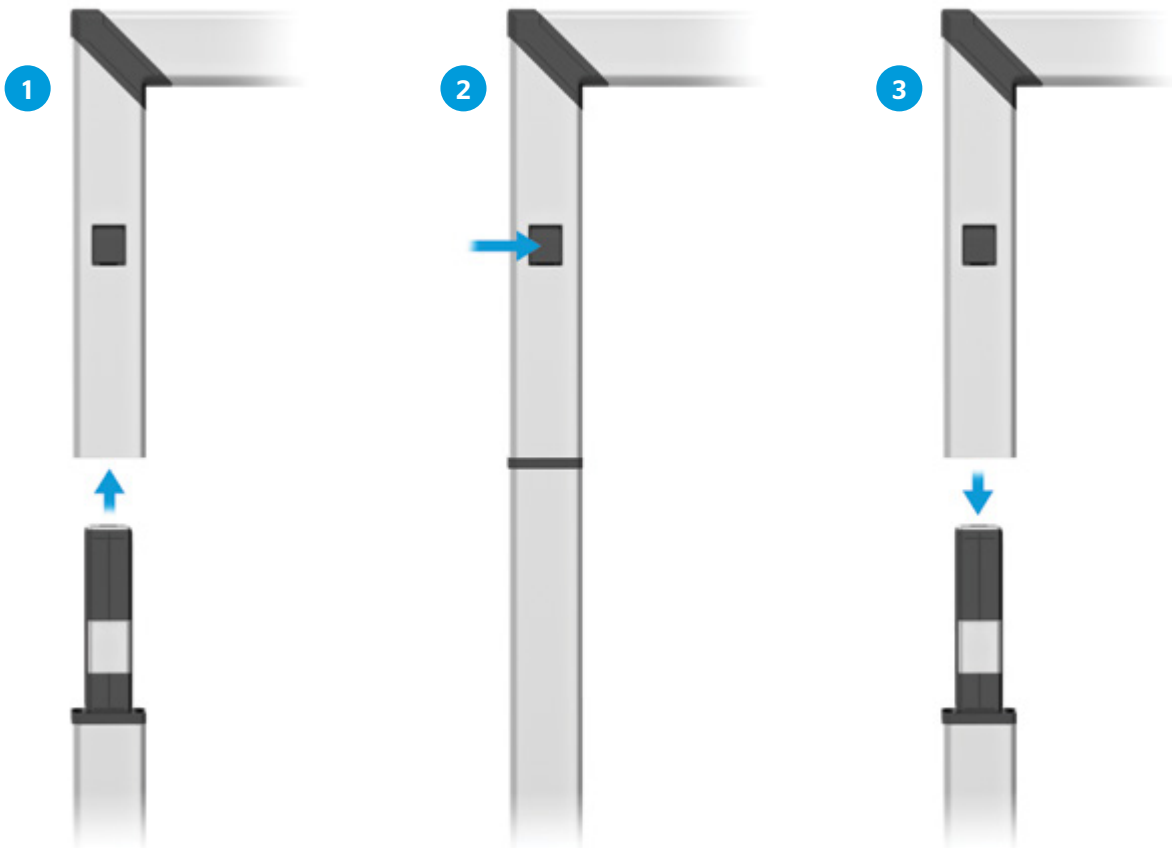

- Internal hinge improves durability and aesthetic
- Increased strength in design that uses epoxy instead of exposed rivets
- Push Button release for easy tear down

Frame easily folds down with the push of a button.

New Corner

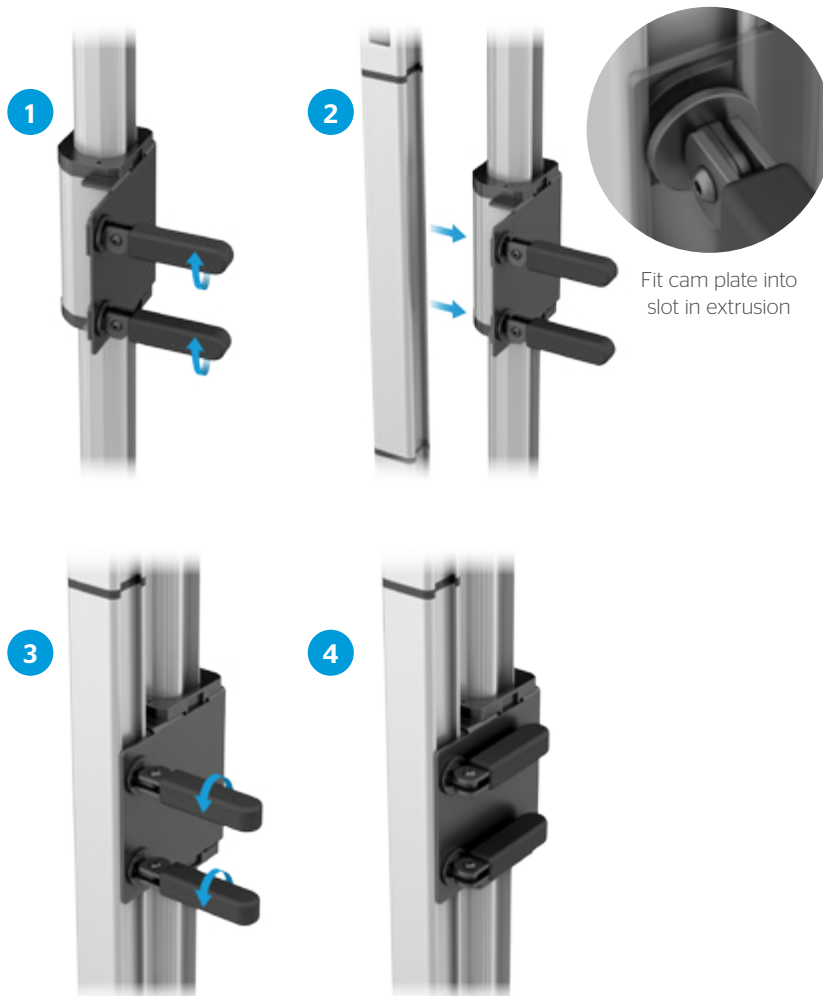

- Interchangeable for easy setup
- Push Button release for easy tear down
- Fixed corner design improves durability
- Welded insert for additional reinforced strength
- Surface Alignment that is the same every time

Frame easily tears down with the push of a button.

New Legs

- No speedy cranks. Easily adjust screen height while screen is assembled and upright with micro-sawtooth height adjustment
- Easily add height adjustment sections when additional height is needed
- Latch-attach to frame
- Lower profile, gliding feet for moving the screen
- Independently levelling feet for uneven floors

Attach legs to the frame in just four easy steps.

Simple height adjustment.

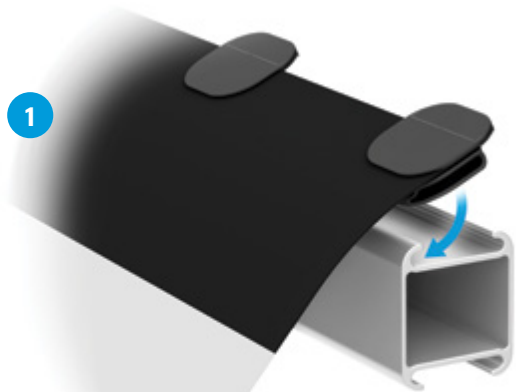

New Case

- Ribbing for increased strength
- Updated internal organization to protect surface and components
- New design featuring 4 wheels
- Designed to be stored upright or stacked horizontally
- New labelling system for quick identification
- Fewer case sizes for simplification

New Surface Formulation

- Foldable, 4K-ready rental surface for HD and 4K projection - only from the chemists at Da-Lite pushing the Science of Surface
- Easy attachment with new clip design

Surface easily attaches to the frame with clip system.

HD Rental

Half Angle: 85° | Gain: 1.0
Front Projection

Dual Vision

Half Angle: 65° | Gain: 0.9
Rear Projection

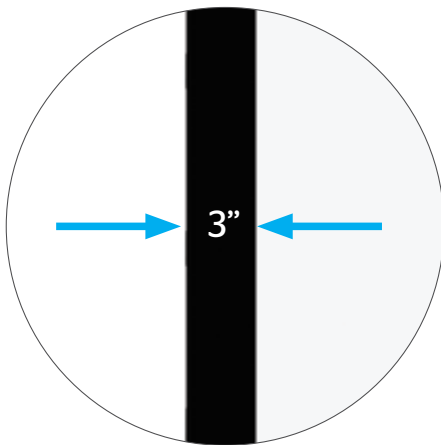

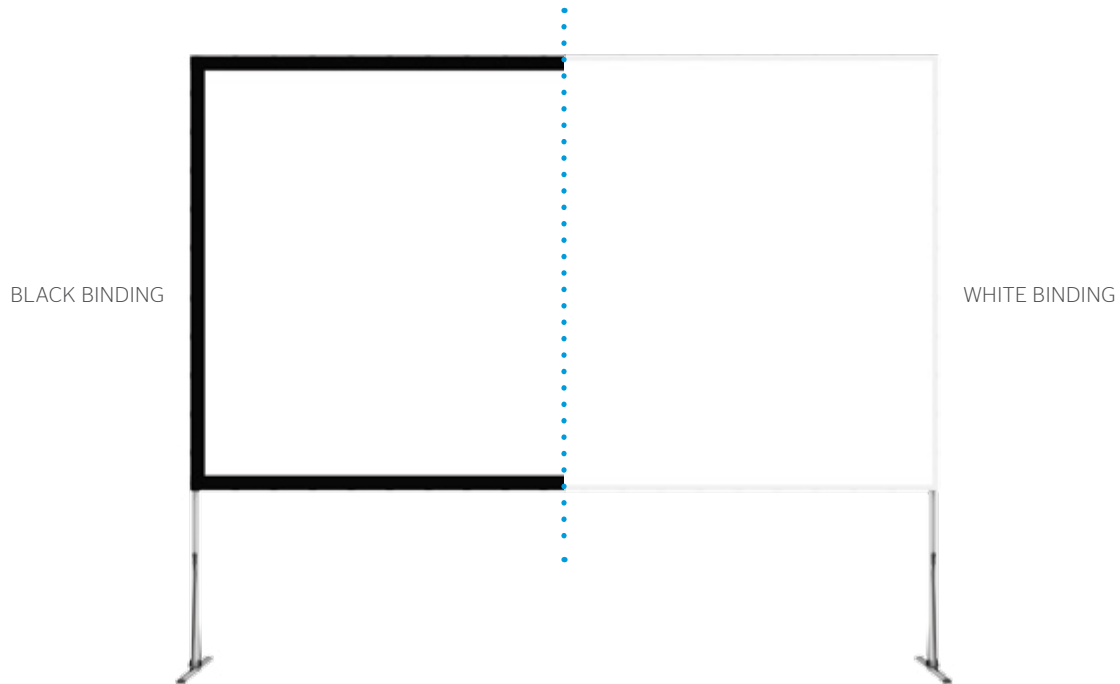

Da-Tex

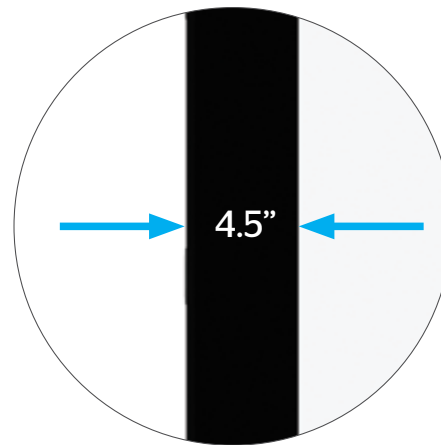

Half Angle: 30° | Gain: 1.3
Rear Projection

New Surface Binding

- New vinyl binding design replaces a woven binding and allows for easier attachment and flexibility
- Smaller 1.0625" white binding wrap-around option for borderless viewing area

3" Black Border For Standard Sizes.

4.5" Black Border For Larger Sizes.

Available Sizes

- Frames available up to 16' in standard extrusion
- Frames available up to 27.5' in large extrusion
